

## 1. Create dataset

```

1  -- Create new table "dataset" and converts a string representation of date to a DATE object.
2
3  CREATE OR REPLACE TABLE `churn-334305.supermarket.dataset`
4  AS SELECT PARSE_DATE("%Y%m%d", SAFE_CAST(SHOP_DATE AS STRING)) AS SHOP_DATE, CUST_CODE
5  FROM `churn-334305.supermarket.data`
6  WHERE CUST_CODE IS NOT NULL
7  ORDER BY SHOP_DATE;

```

dataset

|     | SCHEMA     | DETAILS        | PREVIEW |
|-----|------------|----------------|---------|
|     |            |                |         |
| Row | SHOP_DATE  | CUST_CODE      |         |
| 1   | 2006-04-10 | CUST0000167145 |         |
| 2   | 2006-04-10 | CUST0000774171 |         |
| 3   | 2006-04-10 | CUST0000083013 |         |
| 4   | 2006-04-10 | CUST0000047700 |         |
| 5   | 2006-04-10 | CUST0000135397 |         |
| 6   | 2006-04-10 | CUST0000414458 |         |
| 7   | 2006-04-10 | CUST0000325292 |         |

## 2. Classify customer status

```

1  WITH temp1 AS (
2    SELECT CUST_CODE,
3    FORMAT_DATE('%Y-%m', DATE(SHOP_DATE)) SHOP_MONTH,
4    DATE_DIFF(DATE(SHOP_DATE), '2000-01-01', MONTH) pos,
5    DATE_DIFF(DATE(MIN(SHOP_DATE) OVER(PARTITION BY CUST_CODE)), '2000-01-01', MONTH) first_pos
6  FROM `churn-334305.supermarket.dataset`
7  ), temp2 AS (
8    SELECT *, pos = first_pos AS new_cus
9  FROM temp1
10 ), temp3 AS (
11   SELECT *, LAST_VALUE(new_cus) OVER(win) OR pos - 1 = LAST_VALUE(pos) OVER(win) AS repeat_cus
12   FROM temp2
13   WINDOW win AS (PARTITION BY CUST_CODE ORDER BY pos RANGE BETWEEN 1 PRECEDING AND 1 PRECEDING)
14 ),
15   temp4 AS (
16   SELECT *, LAST_VALUE(new_cus) OVER(win) IS NULL OR pos = LAST_VALUE(pos) OVER(win) AS churned_cus
17   FROM temp3
18   WINDOW win AS (PARTITION BY CUST_CODE ORDER BY pos RANGE BETWEEN 1 PRECEDING AND 1 PRECEDING)
19 ),
20   temp5 AS (
21   SELECT *, pos-2 = LAST_VALUE(pos) OVER(win) AS reactivate_cus
22   FROM temp4
23   WINDOW win AS (PARTITION BY CUST_CODE ORDER BY pos RANGE BETWEEN 2 PRECEDING AND 1 PRECEDING)
24 ),
25   final AS (
26   SELECT SHOP_MONTH, CUST_CODE,
27   CASE
28     WHEN new_cus = true THEN 'New'
29     WHEN repeat_cus = true THEN 'Repeated'
30     WHEN churned_cus = true THEN 'Churned'
31     WHEN reactivate_cus = true THEN 'Reactivated' END AS status,
32   FROM temp5
33 )

```

3. Result  
Code

```
36 SELECT SHOP_MONTH, status,  
37 | if (status='Churned', -1*COUNT(DISTINCT CUST_CODE),COUNT(DISTINCT CUST_CODE)) COUNT  
38 FROM final  
39 WHERE status IS NOT NULL  
40 GROUP BY SHOP_MONTH, status
```
